

FIRST ORCHARD

a cooperative print-and-play harvest game

pick all the fruit before the hungry raven reaches the orchard!

1–4 players · ages 3+ · about 10–15 minutes

everyone wins or loses together

How to play in 20 seconds

On your turn, roll the die (or flip the top roll-card):

- a fruit colour → take one of those fruits off its tree, into the basket
- the basket → take any one fruit you like
- the raven → move the raven forward one step on the path

You are all one team. Win together if you collect ALL 16 fruits

before the raven reaches the orchard. If the raven gets there first, the cheeky bird wins — so play again!

Assembly & full rules

print · cut · play

What to print

Pages 3–7. Cardstock (160–250 g/m²) is ideal; plain paper works if you glue it to cereal-box card. Page 3 = the 4 trees. Page 4 = the 16 fruit tokens. Page 5 = the basket and the raven's path. Page 6 = a fold-up die. Page 7 = a 24-card 'roll deck' if you'd rather draw a card than fold a die (great for little fingers).

Set up

1) Lay the 4 tree boards out where everyone can reach. 2) Punch out the 16 fruit tokens and place 4 matching-colour fruits onto each tree's slots. 3) Put the basket in the middle. 4) Lay the 5 path cards in a row from the raven's nest to the orchard, and stand the raven on the nest (path card 1's left). 5) Build the die (or shuffle the roll deck face-down).

On your turn

Roll the die (or flip the top roll-card), then do what it shows:

Take one RED apple off the red tree and drop it in the basket.

Take one GREEN apple off the green tree.

Take one YELLOW pear off the yellow tree.

Take one BLUE plum off the blue tree.

Lucky! Take ANY one fruit you like, from any tree.

Uh-oh — move the raven forward one step along the path.

If you roll a colour whose tree is already empty, that's fine — just pass the die to the next player. Then it's the next person's turn. Help each other and cheer!

Winning & losing — together

If the team picks ALL 16 fruits before the raven arrives, you ALL win. If the raven reaches the orchard (it's standing past path card 5) while fruit is still on the trees, the raven wins this round — shuffle up and try again.

Make it easier / harder

Easier (younger players): use 6 path cards instead of 5, and let the basket take TWO fruits. Harder (a real race): use only 4 path cards, and the basket takes just one fruit. Solo or two players works exactly the same — you simply take more turns each.

The four fruit trees

cut out · lay on the table · add 4 fruit tokens to each

RED TREE

place 4 fruit tokens here at setup

GREEN TREE

place 4 fruit tokens here at setup

YELLOW TREE

place 4 fruit tokens here at setup

BLUE TREE

place 4 fruit tokens here at setup

The 16 fruit tokens

cut out · place 4 of each colour on its tree

Tip: laminate or glue to thin card so they survive enthusiastic harvesting.

Print at 100% (no 'fit to page'). Cut on solid lines · fold on dashed lines.

Basket & the raven's path

the basket holds picked fruit · the raven walks the path

THE RAVEN · cut out and start on the nest

move it one step along the path each time you roll the raven

THE PATH (lay these 5 cards in a row)

START: raven's nest

raven reaches orchard = raven wins

The colour-symbol die

cut out the cross · fold on dashed lines · tape into a cube

No glue? Tape the edges, or just use the Roll Deck on the next page instead.

Faces: red apple · green apple · yellow pear · blue plum · basket · raven.

Roll deck (no-fold alternative)

cut into 24 cards · shuffle face-down · flip the top card on your turn

Print at 100% (no 'fit to page'). Cut on solid lines · fold on dashed lines.
